

### OPPORTUNITIES IN SINGAPORE BANKING SECTOR

The banking sector of Singapore continues to provide exciting opportunities for local and foreign professionals who wish to pursue a career in this field. Financial analysts and staffing consultants are one in saying that the continuing climate of consolidation through acquisitions and mergers and the renaissance of retail banking in Singapore have resulted to an increase in the hiring of employees.

With this development, an increase in the presence of Filipino professionals in this sector is expected. A significant number of Filipinos can be found in the banking and finance sectors of Singapore, with the majority of them employed as CEOs, investment bankers and analysts.
